

The ASI EP3C3AA000 is a rugged Control Station 3 Hole Enclosure designed to hold up to three 22mm pushbuttons, switches, or pilot devices. Constructed from durable yellow polycarbonate, it offers superior protection with IP65/IP69K and NEMA 4X ratings—perfect for harsh industrial environments. The enclosure's ergonomic, compact design simplifies installation while delivering reliable, maintenance-free operation for multi-function control setups.

Technical specifications

Type	
Product No.	EP3C3AA000
Style	Three Hole
Color	Yellow and Black
Safety	Fully insulated to hose electrical & electronic equipment w.r.t. protection against electric shock.
Material	Bottom Cover: Tough, Impact resistant & fire retardant ABS. Top Cover: Tough, Impact resistant & fire retardant ABS. Gasket: Nitrile rubber, which is good resistant to Oil & acids. Screws: Half threaded Self tapping Cold Forged Screws with blacodising.
Single - Dimensions	65x55x33 mm
Screw Size for Wall Mounting	M3.5 mm Insertion of screws directly through base cover.
Temperature Range	Long term exposure to temperatures above 70° C should be avoided. No significant change in impact strength is noticed up to -20° C.
Degree of Protection	NEMA 4 / IP 65

Key Benefits:

- Multi-device capability – Accommodates up to three 22mm controls for versatile operation
- Tough and reliable – Impact-resistant polycarbonate housing stands up to industrial wear
- High protection rating – IP65/IP69K and NEMA 4X certified for washdown and outdoor use
- Ergonomic and efficient – Streamlined for easy handling, mounting, and wiring
- Zero maintenance – Built to last with no need for regular service
