

The ASI-D10024VRLED is a 22mm red LED indicator light rated for 24V AC/DC and designed for industrial signaling in automation and machinery applications. Featuring a screw terminal connection, integrated Fresnel lens, and UL94V-0 polycarbonate body, this compact pilot light delivers bright, high-visibility feedback in harsh environments. The ASI-D10024VRLED supports quick panel installation with a threaded collar and fits standard 22mm cutouts. Optional IP65 sealing is available. Ideal for control panels, operator stations, and industrial equipment.

Product Diagram

Key Features:

- 22mm Panel Cutout – Compatible with standard industrial panels
- 24VV AC/DC Voltage – Universal signaling across control circuits
- Integrated Red LED with Fresnel Lens – Enhanced brightness and visibility
- IP54 Rated (IP65 Optional) – Resists dust and moisture in industrial settings
- Screw Terminal Connection – Supports up to 14 AWG wires
- UL94V-0 Flame-Retardant Housing – Durable polycarbonate construction
- UL Listed
- LED Lights also available in white, green, yellow, blue, and amber with 12/24V AC/DC, 110V AC, and 230V AC options.
